

JERICHO FERNIN

JUNIOR SOFTWARE ENGINEER

+639269407450 | ferninjericho07@gmail.com | Blk 3A Lot 5 Regina townhomes, Brgy. Singcang-Airport, Bacolod City, Negros Occidental, Philippines

Full-Stack Developer with 1+ year of experience building web applications using the MERN stack. Experienced in collaborating with development teams to design and develop applications from scratch and contributing to microservices-based architectures. Skilled in building scalable APIs, responsive user interfaces, and maintainable backend services.

PROFESSIONAL EXPERIENCE

Junior Software Engineer

Nerve Technologies

October 2024 - Present (Full-time)

- Collaborated with a development team to design and build multiple full-stack applications from scratch using the MERN stack.
- Implemented role-based access control (RBAC) to manage permissions across multiple user roles.
- Coordinated with design and QA teams to refine application features and ensure usability.
- Contributed to the implementation of a microservices architecture to improve system scalability and maintainability.

Junior Software Engineer

Freelance

January 2026 - Present (Part-time)

- Developing a POS system supporting multiple business types including retail, general stores, and restaurants
- Implemented scheduled background jobs using BullMQ to automatically delete branches on a specified date, improving data lifecycle management and system automation.
